

YEAR 1

Year 1 will show few flowers, and there will be weed growth. Systematic mowing can be of benefit to first year stands. Never allow vegetation to grow past 12" tall if you consider mowing. Mowing Height should never be less than 10-12" high and only used when approved by the office.

YEAR 2

Year 2 will show an increase in flowers, and there will be some native bunch grass beginning. No management will be needed in the 2nd year of growth. Spot treatments are always an effective method for controlling invasive plants.

YEAR 3

Year 3 will have a full stand of wildflowers and natives. Enjoy the new planting, controlled burns and mid contract management will keep your practice in the best shape.

YEAR 10
