**Payment & Order DEADLINES**

**Grass Carp - SEPTEMBER 18**

**All Other Orders - OCTOBER 2**

**Free delivery for fish orders over  
\$1000**

**PICK-UP**

Thursday, October 9  
9:00am

**Interstate Center South  
Parking Lot**

1106 Interstate Dr  
Bloomington, IL 61705

Description	Quantity	Price	Total Amount
Fathead Minnows		\$14.00 per pound	
Albino Catfish 4-6" (NB)*		\$7.00 per fish	
Channel Catfish 6-8" (NB)*		\$65.00 per 50	
Channel Catfish 8-10" (NB)*		\$85.00 per 50	
Hybrid Sunfish 1-2"		\$100.00 per 250	
Hybrid Sunfish 3-5"		\$65.00 per 50	
Bluegill 1-2"		\$100.00 per 250	
Bluegill 3-5"		\$65.00 per 50	
Black Crappie 2-4"		\$140.00 per 100	
Redear 1-2"		\$100.00 per 250	
Largemouth Bass 3"		\$85.00 per 50	
Largemouth Bass 5-8"		\$185.00 per 50	
Triploid Grass Carp		\$18.00 per fish	
HB Black OR Blue Pond Dye (Circle one)		\$22.00 per quart	
HB All Seasons Blend Bacteria (2 pounds per acre)		\$11.00 per pound	
Triton High Protein Fish Food		\$50.00 per 50# bag	
Electrofishing Survey		\$975.00 per pond	
Texas Hunter Automatic Fish Feeder (75 lb capacity)		\$1,059.00	
*(NB) - Not bagged, requires pond water and containers			<b>TOTAL</b>

## FISH DESCRIPTIONS

**Fathead Minnows:** Stock in new ponds prior to stocking Largemouth Bass so that they have the opportunity to spawn and provide plenty of feed for the young Bass.

**Channel Catfish:** Outstanding food and sport fish. The species is compatible in lakes and ponds with all fish and works well with Hybrid Sunfish and Largemouth Bass. Growth rates average 1 lbs. per year if fed a commercial feed. Albino Catfish are the same but with white skin and pink eyes.

**Hybrid Sunfish:** Produced by crossing a male Bluegill with a female Green Sunfish. This hybrid cross produces a 90% male, 10% female population, which makes the Hybrid Sunfish an excellent pond fish as it will not overpopulate. The Hybrid Sunfish readily accepts artificial feed and grows to a much larger size than either parent. Growth rates average  $\frac{1}{4}$  -  $\frac{1}{2}$  lb. per year.

**Bluegill:** Fit much of the description of the Hybrid Sunfish except they do not grow as quickly as Hybrid Sunfish. Grows up to 1/2 pound per year.

**Black Crappie:** Excellent for food and sport fishing. Very prolific and not recommended for ponds under 5 acres. Schooling fish that like lots of structures and hiding places; excellent at controlling insects. Can grow up to 1/4 pound per year.

**Redear:** Recommended for deeper ponds and can be stocked along with Bluegill or Hybrid Sunfish. They are a deep water fish, feeding on snails or clams, and are usually harder to catch except during spawning season when they are in the shallows. Can grow up to 1/3 pound per year.

**Largemouth Bass:** One of the most popular fish in America. They are predators and help control stunted Bluegill and Crappie populations. Can grow up to 1/2 to 3/4 pound per year.

**Triploid Grass Carp:** Eat aquatic vegetation, but not algae. This fish will not reproduce. These Carp eat most aggressively in the hot, summer months. Good results are usually seen after a second season. They will eat up to 2-3 times their weight each day.

**HB Black or Blue Pond Dye:** Can be used to limit sunlight penetration and help limit algae & vegetation growth. We recommend 1 quart of blue and 1 quart of black per acre.

**HB All Seasons Blend Bacteria:** A blend of 23 essential vitamins, bio-stimulants, catalyzing enzymes, and select warm and cold water biological species custom blended for lakes and ponds. Recommend 4 lbs per surface acre for initial treatment, then 2 lbs per surface acre per month.

**Triton High Protein Fish Food:** This is a 45% protein (fishmeal based) fish food that can be fed to fish to increase growth rates and enhance the overall health of the fish.

**Electrofishing Survey:** Conducted in existing ponds to determine fish population dynamics and provide recommendations for corrective or supplemental stockings. These services in the survey include, but are not limited to: electrofishing (fish survey), vegetation/ algae analysis, water quality analysis, depth analysis, etc.

**Texas Hunter Automatic Fish Feeder:** A premium fish feeder with a 75 lb capacity that is operated by a programmable timer and powered by a 12 volt battery and solar panel (all included).

Questions about stocking? Contact our IDNR Fish Biologist, Mike Garthaus at [mike.garthaus@illinois.gov](mailto:mike.garthaus@illinois.gov)

## PICK-UP INSTRUCTIONS

All fish **BESIDES** Catfish will be bagged with water at the time of pick up. **Please bring coolers/garbage cans with pond water if you ordered Catfish.**

Please bring coolers, Rubbermaid totes, boxes, etc. to place your bags in for the trip home so that bags do not roll during driving.
